Total	552,936	557,125	572,484	121,806	694,292	672,412	261,599	934,011	2,738,364			

25X1X6

Comments: Figures given for the pharmaceuticals industry in Columns 1 and 2 are merely estimates.

The high index figure (Column 12) for the rubber and asbestos industry is explained by the fact that the Dunaberk did not begin operating until 1940.

Development of new machines since 1936, the use of cellulose, and longer working hours account for the high index figure of the textile industry.
